

PRODUCT INFORMATION

Joining the EP1R and EP3R, the EP6R was developed with 6 fuse carriers and an 8-way neutral bar in the same stylish design. Its introduction perfectly complements our pillar family.

MAXIMUM FUSE CAPACITY

- 6 x 63A

FEATURES

- Ground level marker ensures consistent burial depth
- Fitted with a 8-way neutral bar for convenience
- Strengthened lip for better security
- Air ventilation to help air flow
- Impact and graffiti resistant to reduce maintenance
- UV and heat resistant to increase asset life
- 2x M8 Retention Screws (5mm Hex or T40)
- Tapered screw thread allows centring before tightening
- The plastic lid and base are non-conductive making them safer
- Plastic lid and base recyclable with GYRO-cycled program

Optional Extras:

- Lock, asset tag and/or alternate screws fitted to suit network requirements
- Fuse carrier fitted to your network requirements
- Base is available in classic black with the option option to select khaki or black lid
