

PRODUCT INFORMATION

The Transformer Guards are designed to be used at each end of the concrete plinth underneath ground mounted transformers. These are to cover and protect the cables from the ground to the transformer. Made from 6mm PVC, they are light, manoeuvrable and can easily be cut down to required size on site if necessary. Other sizes can easily be made to order but will be subject to MOQ.

FEATURES

- Light weight for easy transportation
- Easily cut to size for on-site customisation
- Non-conductive for greater safety
- Busck GUA's meet Network Standards

Optional Features

- Custom sizes available on request
- Specific Busck GUA Pad options available.

Based on the requirements of:

- Busck Pad #
- Transformer Type (Etrell, Hitachi, Tyree) &
- Transformer size kVA
