

Make Ready Termination Pit

Product Information

Combined with the GYRO-EV Charger Post, our Termination Pits provide ultimate flexibility for EV Charger choice and simplicity of installation. Future proof your new build, car park or development by using our purpose-designed “invisible” solution. The GYRO-EV Make Ready Termination Pits, can be fitted during civil works for future-proofing an installation and provide a uniform finish every time. The base is made from 100% recycled Polyethylene, and cable entry holes can be drilled on site wherever you may need or feed cables in from the bottom.

STANDARD FEATURES

- Pit Body: 600 mm H (full buried depth) x 200 mm Diameter
- Cable Hole: 115 mm Diameter
- Supplied with a cover plate to secure preinstalled
- wiring for EV Ready developments prior to installation of GYRO-EV Charger Posts
- Fits with all GYRO-EV Charger Posts
- Easy access to Wiring and conduit
- Solid 100% recycled polyethylene structure with nylon top-plate
- “Invisible” installation once the GYRO-EV Charger Post is installed
- Button Socket Screws used to attach cover plate to discourage non-authorized access
- Low cost solution
