

PRODUCT INFORMATION

A small rectangular underground pit designed for cable distribution. The lid is flush with the ground. The pit has provision for four cable ducts, one on each side. Cable entry holes can be cut in the base to suit the size of the ducting, or the bottom of the base removed to the required depth.

FEATURES

- Lid Screws: The lid is secured by two isolated M8 x 30 hex stainless steel screws, ensuring they are insulated from live-wire exposure for maximum public safety
- Pit has provision for 4 x cable ducts (one each side)
- Cable entry holes can be cut to suit size of ducting; or bottom of the base can be removed to required depth
- Made from robust UV stabilised LDPE proven to withstand harsh elements and perform for decades
- Fully recyclable with the GYRO-Cycled program
- The lid is flush with the ground
